## FACULTY OF ENGINEERING AND SPATIAL SCIENCES

DEPARTMENT OF ARCHITECTURE AND SPATIAL PLANNING

| QUALIFICATION: BACHELOR OF GEOINFORMATION TECHNOLOGY |  |
| :--- | :--- |
| QUALIFICATION CODE: 07BGEI | LEVEL: 7 |
| COURSE CODE: GMN621S | COURSE NAME: GEOINFORMATION MANAGEMENT |
| DATE: JUNE 2022 | PAPER: THEORY |
| DURATION: 3 Hours | MARKS: 100 |

| FIRST OPPORTUNITY EXAMINATION QUESTION PAPER |  |
| :--- | :--- |
| EXAMINER: | MRS ROXANNE MURANGI |
| MODERATOR: | MR MIGUEL VALLEJO |

## INSTRUCTIONS

1. Write your student number on each answer sheet used.
2. Answer ALL the questions.
3. Read each question carefully before attempting to answer.
4. Write clearly and neatly.
5. Materials allowed: non-programmable calculator, Ruler, Pen, Pencil, Eraser (rubber), Standard Normal Distribution Tables

## Question 1

Namibia has been experiencing rapid growth of informal settlements in urban areas. The causes of this problem have been researched and debated for a long time. You are part of the team that is conducting a desktop analysis to determine the causes of this problem. Answer the questions below.
1.1. Identify four main reasons/causes of informal settlement growth (i.e., 1 st level).
1.2. For each of the main reasons/causes identify two sub causes (2nd level).
1.3. Develop a problem tree depicting the main problem, causes and effects of informal settlements in an urban area.

## Question 2

List four main types of GIS implementation levels in an organisation. For each, explain what reasons could trigger the "Thinking about Implementing a GIS" at that level.

## Question 3

Describe briefly what a "Needs Assessment "is and why it is done (max. four points for the general explanation and max. six points for the description of its components).

## Question 4

During the needs assessment, a GIS planner would conduct a technology seminar. Information Product Description (IPDs) is one of the main outputs of such a seminar.
4.1 What is the critical function of the IPDs in a GIS planning process?
4.2 What is the relation between IPD and MIDL?
4.3 List only six of the components of an IPD.

## Question 5

The quality of a GIS analysis depends on the quality of data and the skills of the person doing the analysis.
5.1 Briefly explain the four main types of spatial errors that are possible in GIS.
5.2 For each error type, name one way how to minimize the error in a GIS database.
5.3 What is the difference between the accuracy and precision of spatial data?

## Question 6

6.1 Briefly explain the four characteristics that influence data sources and design.
6.2 Explain the three common logical models for GIS Database designs.

## Question 7

Namibia is busy implementing a National Spatial Data Infrastructure (NSDI) Policy and the Namibia Statistics Agency (NSA) is mandated by the Statistics Act, No. 9 of 2011 to implement this.
7.1 State and describe briefly the two categories of spatial data that one finds in the National Spatial Data Infrastructure in Namibia. Give one example of each type.
7.2 Define what you understand by spatial data infrastructure (SDI) and name two types.

## Question 8

You are a consultant hired to collect data for a GIS for urban development monitoring. As part of your task, you are required to determine the appropriate scale and corresponding primary data sources.
8.1 Assuming you have to produce a map for a town planning firm. What would be the scale of the map if a $20 \mathrm{~m} \times 40 \mathrm{~m}$ erf is $10 \mathrm{~mm} \times 20 \mathrm{~mm}$ on the map?
8.2 Now that you have determined the scale of your map, what would be the perimeter in cm of a school sports field area on the map if the perimeter on the ground is 400 m ?
8.3 Assume a person offers you a 3.6 Ha plot to buy and then shows you the location of the plot on a map with the same scale as in (7.3). The plot which he shows you is a rectangular polygon and measures $8 \mathrm{~cm} \times 10 \mathrm{~cm}$ on the map. By how much bigger or smaller (in ha) is this plot on the ground?
8.4 The maximum West-East extension of the NUST premises (including the Main Campus, the Sub-Campus, and the Hotel School) is about 900 m , The maximum north-south extension is about 400 m . Can you print the entire NUST Campus premises on a single DIN A 4 page at a scale of $1: 2,500$ ?
(Note: A DIN A 4-page measures $29.7 \times 21 \mathrm{~cm}$ ) Assume that 1 cm along all four edges cannot be printed!) Please motivate your answer with a comprehensible calculation!

## Question 9

After conducting a needs assessment and a technology development seminar for GIS for solid waste mapping and monitoring, you came up with six activities with their duration (in days) as shown in the table below. Round off to two decimal places.

| Task | Predecessor | Optimistic <br> Time, OT | Most <br> likely <br> Time, MT | Pessimistic <br> Time, PT | Expected <br> Time, ET | $\sigma_{\text {Path }}{ }^{2}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| A |  | 3 | 6 | 12 |  |  |
| B | A | 5 | 11 | 7 |  |  |
| C | B | 8 | 15 | 20 |  |  |
| D | C | 5 | 14 | 18 |  |  |
| E | C | 2 | 19 | 13 |  |  |
| F | D, E | 14 | 15 | 22 |  |  |

9.1 Calculate the expected time for each activity.
9.2 Calculate the variance of the paths.
9.3 Construct the PERT diagram.
(2)
9.4 Identify and determine the duration of the critical path.
(2)
9.5 Calculate the specified time if the probability of completing the project is $92 \%$.
(3)
9.6 Calculate the probability of completing the project in 89 Days.

Below are the given formulae to help you answer Question 9.

$$
z=\frac{\text { specified time }- \text { critical path expected time }}{\text { path standard time }}=\left(\frac{D T-\mathrm{E}_{\mathrm{T}}}{\sqrt{\sigma p a t h^{2}}}\right)
$$

Where DT = the specified time
$\mathrm{E}_{\mathbf{T}}$ Path $=$ the expected completion time of the critical path

$$
\sigma_{\text {Path }}{ }^{2}=\text { variance of path }
$$

Variance of each task, $\operatorname{Var}^{2}=\sigma^{2}=\left(\frac{p-0}{6}\right)^{2}$
STANDARD NORULAL DISTRIBCTION: Table Values Represent AREA to the LEFT of the $Z$ score.
