DEPARTMENT OF ARCITECTURE AND SPATIAL SCIENCES

| QUALIFICATIONS: <br> BACHELOR OF GEOMATICS and DIPLOMA IN GEOMATICS |  |
| :--- | :--- |
| QUALIFICATIONS CODES: <br> 07BGEO, 06DGEO | QUALIFICATION LEVEL: <br> Level 7-07BGEO <br> Level 6-06DGEO |
| COURSE CODE: BSV521 | COURSE NAME: Basic Surveying |
| DATE: June 2022 | PAPER: THEORY |
| DURATION: 3 HOURS | MARKS: 100 |

| FIRST OPPORTUNITY EXAMINATION QUESTION PAPER |  |
| :--- | :---: |
| EXAMINER: | Mr F. J. Louw |
| MODERATOR: | Mr S. Sinvula |

INSTRUCTIONS

1. You MUST answer ALL QUESTIONS
2. Write clearly and neatly.
3. Number the answers clearly.
4. Make sure your Student Number is on the EXAMINATION BOOK(s).
5. MAKE SURE YOUR STUDENT NUMBER IS ON THE DATA SHEET AND THAT YOU SUBMIT IT WITH YOUR EXAMINATION BOOK(S).

PERMISSIBLE MATERIALS

1. Calculator, ruler, pencil and eraser.

THIS QUESTION PAPER CONSISTS OF 7 PAGES (Including this front page and 1 Data Sheet)

## Question 1

1.1. Differentiate between a Measurement and an Observation.
1.2. Distinguish between "Zero south orientation" and "True orientation".
1.3. To carry out a survey one needs to consider certain principle factors before executing the survey, describe ALL these principle factors.
1.4. How would you test for the presence of parallax in the telescope of a theodolite?

## Question 2

2.1. Use the following information and the sketch below to answer the questions below.

Distance $A C=77.105 \mathrm{~m}$
Distance $B E=62.663 m$
Distance DE $=13.569 \mathrm{~m}$
Angle $\alpha=37^{\circ} 14^{\prime} 53^{\prime \prime}$
Angle $\beta=15^{\circ} 53^{\prime} 47^{\prime \prime}$

2.1.1. Calculate the sides $A B$ and $A E$, using angle $\alpha$ and distance $B E$ in the $\triangle A B E$. Check your answer.
2.1.2. Calculate the side EC using $\triangle \mathrm{ACE}$.
2.1.3. Calculate the side $A D$ using $\triangle A B D$.
2.2. Use the levelling observations given on the levelling field sheet below to determine the final heights using ANY METHOD which provides a full arithmetic check. All usual checks must be done, and any mis-closures need to be distributed. Note that the BOLD values are the Inverted Staff Readings.

Levelling field sheet

|  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Point | B.S. | I.S. | F.S. | Final <br> Heights |
|  |  |  |  |  |
| ROOF 1 | -0.524 |  |  | 1217.016 |
| A |  | 0.817 |  |  |
| B | 0.966 |  | 0.975 |  |
| ROOF 2 |  | 0.899 |  |  |
| C | -0.838 |  | -0.920 |  |
| D |  | 1.207 |  |  |
| E |  | 1.231 |  |  |
| ROOF 3 |  |  | -0.802 | 1217.355 |

## Question 3

3.1. Use the field observations at ROCK, to calculate final observed directions.

| @Rock | $\mathrm{HI}=1.587 \mathrm{~m}$ |  |
| :--- | :---: | :--- |
| Point | Circle Left | Circle Right |
| $\Delta$ Wind | $287^{\circ} 53^{\prime} 45^{\prime \prime}$ | $107^{\circ} 53^{\prime} 38^{\prime \prime}$ |
| $\Delta$ Outlook | $298^{\circ} 19^{\prime} 11^{\prime \prime}$ | $118^{\circ} 18^{\prime} 54^{\prime \prime}$ |
| Stok | $131^{\circ} 04^{\prime} 53^{\prime \prime}$ | $311^{\circ} 05^{\prime} 03^{\prime \prime}$ |
| Pole | $169^{\circ} 59^{\prime} 54^{\prime \prime}$ | $350^{\circ} 00^{\prime} 08^{\prime \prime}$ |
| RO | $287^{\circ} 53^{\prime} 48^{\prime \prime}$ | $107^{\circ} 53^{\prime} 45^{\prime \prime}$ |

3.2. Use the following Formula and the observations at POP, to answer the questions that follows.

## Please note:

The Instrument Correction and Prism Constant, the Atmospheric Correction, and the Conversion to German Legal Metre are already applied to all measured distances.

Combined Sea level \& Scale Enlargement Factor $=1+\left[\left(y^{2} /\left(2 R^{2}\right)\right)-(H / R)\right]$, where $R=6370 \mathrm{~km}$.

Co ordinates

| Name | Y | X | Z/Height |
| :--- | :---: | :---: | :---: |
| $\Delta$ DURANT | +40312.280 | -54416.470 |  |
| $\Delta$ JAGER | +56141.390 | -50981.830 |  |
| POP | +39774.150 | -57965.790 | 1750.000 |

@ POP Height of Instrument is 1.658 m .

| Name | Final Observed Direction | Slope Distance | Zenith Angle |
| :--- | :---: | :--- | :--- |
| $\triangle$ DURANT | $8^{\circ} 37^{\prime} 18^{\prime \prime}$ |  | $89^{\circ} 45^{\prime} 48^{\prime \prime}$ |
| $\triangle$ JAGER | $66^{\circ} 53^{\prime} 37^{\prime \prime}$ |  | $89^{\circ} 45^{\prime} 48^{\prime \prime}$ |
| ST1 | $127^{\circ} 34^{\prime} 36^{\prime \prime}$ | 332.319 m | $91^{\circ} 24^{\prime} 44^{\prime \prime}$ |

3.2.1. Calculate and apply all corrections to observations at POP(directions \& distances).
3.2.2. Calculate the co-ordinates for ST1

## Question 4

4.1. Calculate the traverse on Data Sheet 1. Use the said Data Sheet for all your calculations. Use the Bowditch Rule to adjust the traverse. Please note that the directions are oriented, and the distances are final. Please detach the Data Sheet and submit with your examination book. (10)

### 4.2. Use the following observations at ST2, to calculate the $Y$ and $X$ co-ordinates for ST2.

## Please note:

The Prism Constant, the Atmospheric Correction, the Conversion to German Legal Metre, and the Combined Sea level \& Scale Enlargement Scale Factor correction are already applied to all measured distances.

Co-ordinates

| Name | Y | X | Z/Height |
| :--- | :---: | :---: | ---: |
| $\Delta$ Eros | -10489.688 | +60272.255 | 1810.680 |
| TSM14 | -5297.730 | +59471.920 |  |

@ ST2 Height of Instrument is $1,750 \mathrm{~m}$.

| Name | Fin. Observed Direction | Slope Distance | Zenith Angle |  |
| :--- | :--- | :--- | :--- | :--- | Height of Target

## Question 5

5.1. Use the information and observations below to calculate the co-ordinates for the point DOP, by using the $Q$-point method of a resection calculation.

Co-ordinates

| Name | Y | X |
| :---: | :---: | :---: |
| $\triangle$ DRAAI | -27114.600 | + 154255.400 |
| $\triangle$ NAB | - 35842.500 | + 153064.100 |
| $\triangle$ SES | -29097.400 | + 171069.100 |
| @ DOP | Height of Instrument $=1.719 \mathrm{~m}$ |  |
| Name | Final Observed Dir. |  |
| $\triangle$ DRAAI | $147^{\circ} 16^{\prime \prime} 0{ }^{\prime \prime}$ |  |
| $\triangle$ NAB | $253^{\circ} 23^{\prime} 23^{\prime \prime}$ |  |
| $\triangle$ SES | $10^{\circ} 05^{\prime \prime} 5{ }^{\prime \prime}$ | Long Leg |

5.2. Use the following Formula to calculate the height of H 100 .
$\Delta H_{a b}=H_{l}-H_{s i g}+S_{a b} / \operatorname{Tan}(Z)+(1-k) . S^{2} /(2 R)$
$\mathrm{H}_{\mathrm{a}}=\mathrm{H}_{\mathrm{b}}-\Delta \mathrm{H}_{\mathrm{ab}}$
Where $R$ is earth radius (use $R=6370000 \mathrm{~m}$ ), and $k$ is an assumed relative ray curvature factor (use $k=0.13$ ).

## Co-ordinates

| Point | Y | X | Z |
| :--- | :---: | :---: | :---: |
| $\Delta$ Slangkop | -10489.680 | +60272.260 | 1807.300 (Ground Level) |
| H1 | -6845.587 | +63371.410 |  |

The JOIN distance from H 100 to $\Delta$ Slangkop is $\mathbf{4} 783.738 \mathrm{~m}$

| @ H100 | $\mathrm{HI}=1.780 \mathrm{~m}$ |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Point/Station | Oriented Dir. | Slope Distance | Zenith Angle | Height of Pillar/Target |
| $\Delta$ Slangkop | 178 ${ }^{\circ} 20^{\prime} 25^{\prime \prime}$ |  | 89 ${ }^{\circ} 50^{\prime \prime} 57^{\prime \prime}$ | 1.200 m (Top of Pillar) |
| WP1 | $41^{\circ} 37^{\prime} 04 \prime$ | 696.561 | $90^{\circ} 02^{\prime \prime} 07^{\prime \prime}$ | 1.865m (Top of Target) |

Student Number $\qquad$

## Data Sheet 1

Question 4.1.

## Bowditch Adjustment Sheet

Note: All answers must be rounded off to $\mathbf{3}$ decimal places
