NAMIBIA UNIVERSITY
OF SCIENCE AND TECHNOLOGY

FACULTY OF HEALTH, NATURAL RESOURCES AND APPLIED SCIENCES

DEPARTMENT OF MATHEMATICS AND STATISTICS

QUALIFICATION: BACHELOR OF AGRICULTURAL MANAGEMENT	
QUALIFICATION CODE: 07BAGR	**LEVEL:** 5
COURSE CODE: AGS520S	**COURSE NAME:** AGRICULTURAL STATISTICS
SESSION: JANUARY 2023	**PAPER:** THEORY
DURATION: 3 HOURS	**MARKS: 100**

SUPPLEMENTARY/SECOND OPPORTUNITY EXAMINATION QUESTION PAPER	
EXAMINER	J. AMUNYELA
MODERATOR:	Mr A. ROUX

INSTRUCTIONS
1. Answer ALL the questions in the booklet provided. 2. Show clearly all the steps used in the calculations. 3. All written work must be done in blue or black ink and sketches must be done in pencil.
ATTACHMENT: Formula sheet, t-table, z-tables, chi-square table

PERMISSIBLE MATERIALS

1. Non-programmable calculator without a cover.

THIS QUESTION PAPER CONSISTS OF 6 PAGES (Including this front page)

SECTION A

QUESTION 1 [22 marks]

Write down the letter corresponding to your choice next to the question number.

1.1 A random sample of size $n = 11$ was selected from a population and the data are as follows: 32,30, 45, 23, 51, 82 ,69, 12 ,71 ,65, 42. Use this dataset to answer questions 1.1.1 through 1.1.3

1.1.1 The point estimate for the mean is [2]

A. 50.5

B. 47.45

C. 32

D. 45.47

1.1.2 The point estimate for the standard deviation [2]

A. 22.29

B. 29.22

C. 496.67

D. 67

1.1.3 The standard error of the sample mean is equal to [2]

A. 50.3

B. 6.72

C. 71.6

D. 22.29

1.2 Which of the following is a property of the median [2]

A. there may be no median

B. there may be several medians

C. not affected by extreme values

D. not unique

1.3 Which of the following test can be used in statistics when $n = 30\ and\ \sigma = 5$? [2]

A. T-test

B. Z-test

C. one-way ANOVA

D. Kruskal-Wallis test

1.4 Inferential statistics are techniques that allow us to use: [2]

A. samples to make generalizations about the populations from which the samples were drawn

B. population parameter to make generalizations about the whole populations

C. population parameter to make generalizations about the sample statistics

D. calculate sample statistics

1.5 As part of a study to investigate the effects of stubble burning, one of the variable measured at the site is **type of crop grown** (e.g.,0=maize,1= oats, 2= others). [2] Which measurement scale should be considered when analysing this variable

A. ordinal

B. interval

C. nominal

D. ratio

1.6 The sampling technique whereby members of the population are placed in an array and every tenth member is selected is an example of: [2]

A. Random sampling

B. Systematic sampling

C. Cluster sampling

D. Stratified sampling

1.7 The variable number of goats born per year is a_____ random variable [2]

A. continuous

B. descriptive

C. discrete

D. normal

1.8 Which of the following is a condition for binomial distribution [2]

A. The probability of success does not change from trial to trial

B. Trials are dependent

C. more than two outcomes are expected

D $P + q > 1$

1.9 The average number of goats sold by the Phalao farm is 5 goats per day. What is the probability that exactly 3 goats will be sold tomorrow? [2]

A. 0.1404

B. 0.2123

C. 0.8422

D. 0.2807

SECTION B (Clearly show all your work)

QUESTION 2 [41 marks]

2.1 In 2015, three hundred deaths of cows related to drought were recorded daily in Omusati region. The table below display the grouped data for three hundred cows that died because of drought just within 40 days.

Days	0-5	5-10	10-15	15-20	20-25	25-30	30-40
Number of cows	2	0	8	36	110	78	66

2.1.1 Estimate the mean, median and the mode of the distribution. [10]

2.1.2 Find the variance and the standard deviation for the dataset. [5]

2.1.3 Suppose that you suspected an outlier in the dataset above, which measure of central location would you prefer to describe the data and why? [2]

2.2 Let X be the random variable with the following probability distribution

X	4	0	2	3	1
P(X)	0.05	0.3	0.25	0.25	0.15

2.2.1 Estimate the mean for a random variable 2X [4]

2.2.2 Estimate the variance and the standard deviation for a random variable X [5]

2.2.3 Find $P(X \geq 2)$ [2]

2.3 In a citrus orchard it is found that 5% of the oranges are affected by a disease. To test for the presence of the disease a farmer selects six trees at random. If X is a binomial random variable which represent the number of trees affected:

NB round your answers to 4 d.p

2.3.1 What is the probability that exactly two trees are affected [3]

2.3.2 What is the probability that at most one tree is affected [4]

2.3.3 What is the probability that more than five trees are affected [2]

2.3.4 Calculate the mean and variance for the random variable X [4]

QUESTION 3 [26 marks]

3.1 Consider a machine which is filling bottles with milk at Namib diaries. Experience has shown that in this process the population of fill volume are normally distributed with a standard deviation of $1.35\ ml$. The manager wants to collect a sample just large enough to provide a sample mean within $0.50\ ml$ of the true process mean at the 90% confidence level. Calculate the sample size needed [3]

3.2 A dairy processing company claims that the variance of the amount of protein in the whole milk processed by the company is more than $0.3\ mg$. You suspect that this is wrong and find that a random sample of 25 milk containers has a variance of 0.27. At 1% level of significance, is there enough evidence to reject the company's claim?

3.2.1 State the hypothesis that you would use to test the company's claim. [2]

3.2.2 Test the hypothesis in question 3.2.1 [7]

3.2.3 Construct a 95% confidence interval for the unknown population standard deviation [5]

3.3 Tangi grows maize in her two small plots of equal sizes. She is interested in comparing the mean yields from two plots after applying fertilizer A and B to the two plots respectively. She monitors the yields (in 100kg) for period five consecutive years. The table below shows the results recorded:

	2012	2013	2014	2015	2016
Fertilizer A	7.4	5.2	6	4.3	8.3
Fertilizer B	5.5	5	3.5	4.5	7

Estimate the mean difference between the maize yields for Julia's plots, using a 99% confidence level. [9]

QUESTION 4 [11 marks]

4.1 The table below shows the heights (in meters) of a random sample of eight guava trees in Haingura's backyard garden.

Tree	A	B	C	D	E	F	G	H
Height	1.05	0.99	1.2	1.36	1.55	0.98	0.95	0.85

4.1.1 Estimate the variance of the entire population of guava trees in Haingura's garden with a 95% degree of confidence. [9]

4.1.2 Haingura decides to continue growing guava trees in his garden if the population variance for the height of these trees is more than 1.55 meters. Formulate the null and alternative hypothesis that he would use if he wished to test for the above claim. [2]

END OF EXAMINATION QUESTION PAPER

FORMULA SHEET

$$M_e = L + \frac{c[0.5n - CF]}{f_{me}} \qquad M_0 = L + \frac{c[f_m - f_{m-1}]}{2f_m - f_{m-1} - f_{m+1}}$$

$$\bar{x} = \frac{\sum fx}{n} \qquad Z = \frac{\bar{x} - \mu}{\frac{\sigma}{\sqrt{n}}}$$

$$\bar{x} \pm Z_{\frac{\alpha}{2}}\left(\frac{\sigma}{\sqrt{n}}\right) \qquad (p_1 - p_2) \pm Z_{\frac{\alpha}{2}}\left(\sqrt{\frac{p_1 q_1}{n_1} + \frac{p_2 q_2}{n_2}}\right)$$

$$t_{stat} = \frac{\bar{x} - \mu}{\frac{s}{\sqrt{n}}} \qquad \frac{(n-1)S^2}{\chi^2_{\frac{\alpha}{2}, n-1}} < \sigma^2 < \frac{(n-1)S^2}{\chi^2_{1-\frac{\alpha}{2}, n-1}}$$

$$\chi^2_{stat} = \frac{(n-1)S^2}{\sigma^2} \qquad \chi^2_{stat} = \sum \frac{(f_0 - f_e)^2}{f_e}$$

$$E(X) = \sum x_i p_i \qquad V(X) = \sum (x_i - \mu)^2 p(x_i)$$

$$P(X = x) = \binom{n}{x} p^x q^{n-x} \qquad n = \frac{Z^2(\sigma^2)}{E^2}$$

$$b = \frac{n\sum xy - \sum x \sum y}{n\sum x^2 - (\sum x)^2} \qquad a = \bar{y} - b\bar{x}$$

$$Z_{cal} = \frac{(p_1 - p_2) - (\pi_1 - \pi_2)}{\sqrt{\hat{\pi}(1 - \hat{\pi})\left(\frac{1}{n_1} + \frac{1}{n_2}\right)}}$$

$$\hat{\pi} = \frac{x_1 + x_2}{n_1 + n_2}$$

$$\bar{x} = \frac{\sum x}{n} \qquad s^2 = \frac{\sum (x_i - \bar{x})^2}{n-1}$$

$$n = \frac{z^2 p(1-p)}{E^2} \qquad s^2 = \frac{\sum (x_i - \bar{x})^2 f_i}{n-1}$$

$$p \pm z\sqrt{\frac{pq}{n}} \qquad \bar{x} \pm t_{\frac{\alpha}{2}, n-1}\left(\frac{s}{\sqrt{n}}\right)$$

$$Z = \frac{x - \mu}{\sigma} \qquad (\bar{x}_A - \bar{x}_B) \pm t\sqrt{\frac{s_A^2}{n_A} + \frac{s_B^2}{n_B}}$$

$$P(X = k) = \frac{e^{-\theta}\theta^x}{x!} \qquad t = \frac{(\bar{x}_1 - \bar{x}_2) - (\mu_1 - \bar{\mu}_2)}{\sqrt{\frac{S_1^2}{n_1} + \frac{S_2^2}{n_2}}}$$

TABLE of CRITICAL VALUES for STUDENT'S t DISTRIBUTIONS

Column headings denote probabilities (α) ***above*** tabulated values.
