| EXAMINER(S) | MS. ESTHER OLIVIER MR. JOSHUA MARIO | |
| MODERATOR: | MR. KANDJIMI | |

| | INSTRUCTIONS |
|----|----------------------------|
| 1. | Answer ALL the questions. |
| 2. | Write clearly and neatly. |
| 3. | Number the answers clearly |

PERMISSIBLE MATERIALS

1. Business calculator

THIS EXAMINATION PAPER CONSISTS OF 4 PAGES (Including this front page)

SECTION A Question 1

[20 MARKS] [10 x 2 = 20 marks]

Choose the correct option and indicate your choice (A-D) next to the appropriate number in the examination book provided. For example 1. B.

| exa | amination book provided. For example 1. B. |
|-----|--|
| 1. | Project management is a discipline with a strong foundation in a well-defined, well-documented established body of knowledge. This is known as the: |
| A. | PMBOK. |
| В. | PMI. |
| C. | POMBK. |
| D. | AMBK. |
| 2. | The purposes of should be to determine whether the project provided the |
| | customer with the expected benefits, assess the level of customer satisfaction, and obtain any feedback that would be helpful in future business relationships with this customer or with other customers. |
| Α. | a post-project evaluation meeting with the customer or sponsor |
| | a project progress meeting with project stakeholders |
| | an analysis session with the project team |
| | a pre-RFP meeting with the customer |
| 3. | Risks should be given higher priority because if the risk occurs, it would have a greater impact on the schedule than if it was associated with activities on a path that has a large positive value of total slack. |
| ٨ | that occur first in the project |
| | |
| | that affect the most costly activities on the critical path |
| | |
| υ. | that affect the activities near the end of the project |

- 4. Projects documents are organised and archived in the
- A. initiating phase.
- B. planning phase.
- C. performing phase.
- D. closing phase.
- 5. The project objective is usually defined in terms of
- A. all the constraints for the project.
- B. the end product or deliverable, schedule, and budget.
- C. initiating, planning, executing, and controlling.
- D. the project scope.

- 6. Earliest finish time (EF) is the earliest time by which a specific activity can be completed, is calculated
- A. by subtracting the activity's estimated duration from the earliest finish time of the activity's predecessor: EF = EF predecessor estimated duration.
- B. by subtracting the activity's estimated duration to the activity's earliest start time: EF = ES estimated duration.
- C. by adding the activity's estimated duration to the earliest start time of the activity's succeeding activity: EF = ES succeeding activity + estimated duration.
- D. by adding the activity's estimated duration to the activity's earliest start time: EF = ES + estimated duration.
- 7. Calculate the earliest finish for Task B if its predecessor, Task A, finishes on day 3 and the duration of Task B is 2 days.
- A. day 5
- B. day 3
- C. day 1
- D. Cannot be calculated based upon information given.
- 8. Free slack is calculated by finding the lowest of the values of total slack for all the activities entering into a specific activity and then
- A. adding it from the values of total slack for the other activities also entering into that same activity.
- B. subtracting it from the values of total slack for the other activities succeeding after that same activity.
- C. subtracting it from the values of total slack for the other activities also entering into that same activity.
- D. adding it from the values of total slack for the other activities succeeding after that same activity.
- 9. If the cumulative earned value is N\$10 and the cumulative actual costs are N\$20, then the CPI is
- A. N\$10.
- B. -N\$10.
- C. 0.5.
- D. 2.0.
- 10. Calculate the forecasted cost at completion if the total budgeted cost = N100\,000$, the CEV is N80\,000$, and the CAC is N40\,000$.
- A. FCAC = N\$50 000
- B. FCAC = N\$200 000
- C. FCAC = N\$60 000
- D. FCAC = N\$40 000

SECTION B [60 MARKS]

Question 2 (15 Marks)

You are a project manager and have new project that will commence soon. The client has requested a project scope from you before the project starts. Six (6) elements are always included in the project scope. Identify and discuss all the elements that a project manager will include in the project scope checklist in order to ensure that the scope definition is complete.

Question 3 (15 Marks)

Draw a network diagram representing the following information:

- The project starts with three activities A, B, and C which can be done concurrently.
- When A is finished, D can start
- · When B is finished, F can start
- When B and D are finished, E can start.
- The project is complete when C, E, and F are finished.

Question 4 (15 Marks)

Under what circumstances would you use laddering in a network diagram? Give an example and draw the corresponding network diagram.

Question 5 (15 Marks)

Using the following figure, perform resource-limited scheduling. Assume that you have only three workers available at any given time. What is the new completion date for the project?

| | Tas | k 1 (2 | worke | ers) | | !] | | | l | <u> </u> | L |
|---------|------|--------|--------|------|-----------|------------|--------|-------------|---------------|--------------|---|
| | Task | 2 (1 w | orker) | | <u> </u> | | | | | | 1 |
| | Task | 3 (3 M | orkers | 5) | | | | | ĺ | | İ |
| | | | | Tas | k 4 (2 | ı worke | ers) | | | | L |
| | | | | | <u> </u> | Task | 5 (1 w | r orker) | l | | 1 |
| | | | | | İ | Ī | | Task | 6 (3 workers) | | |
| | | | | | | | | | l | | Ī |
| Day | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | |
| Workers | 6 | 6 | 6 | 4 | 2 | 3 | 3 | 4 | 3 | 3 | |

TOTAL MARKS: 80
