## FACULTY OF HEALTH, NATURAL RESOURCES AND APPLIED SCIENCES

SCHOOL OF AGRICULTURE AND NATURAL RESOURCE SCIENCES DEPARTMENT OF NATURAL RESOURCES SCIENCES

| QUALIFICATION: BACHELOR OF NATURAL RESOURCES MANAGEMENT HONOURS |  |
| :--- | :--- |
| QUALIFICATION CODE: 08BNRH | LEVEL: 8 |
| COURSE CODE: RMC811S | COURSE NAME: RESEARCH METHODS FOR NATURAL <br> SCIENCES |
| DATE: JULY 2023 | MARKS: 100 |
| DURATION: 3 HOURS |  |

| SECOND OPPORTUNITY/SUPPLEMENTARY EXAMINATION QUESTION PAPER |  |
| :--- | :--- |
| EXAMINER(S) | Dr Tendai Nzuma (Section A: Scientific Writing) |
|  | Dr Meed Mbidzo (Section B: Statistics) |
| MODERATOR: | Dr M. Mwale |

## INSTRUCTIONS

1. Answer ALL the questions
2. Write clearly and neatly.
3. Number the answers clearly.

## PERMISSIBLE MATERIALS

1. Examination question paper
2. Answering book
3. Calculator

THIS QUESTION PAPER CONSISTS OF 5 PAGES (Excluding this front page)

## SECTION A: SCIENTIFIC WRITING

## QUESTION 1

Discuss the importance of ethical considerations in scientific research and provide an example of an ethical issue that researchers in Namibia may face.

## QUESTION 2

Describe the process of peer review in scientific publishing and explain its importance. Provide an example of a peer-reviewed article from a journal published in Namibia.

## QUESTION 3

Explain the concept of plagiarism and its consequences in scientific writing. Provide an example of plagiarism from a research article conducted in Namibia.

## SECTION B: STATISTICS

## QUESTION 4

What statistical procedure would you use for the following research questions and/or scenarios?
a) Concentrations of nitrogen oxides was determined in two urban suburbs. You want to test the hypothesis that the air pollutant was present in the same concentrations in the two suburbs.
b) A researcher wants to determine if there is a relationship between soil moisture content and nitrogen mineralization rates.
c) A researcher wishes to analyse how gender influences participation of local communities in natural resource decision making. Specifically, individual's attendance of meetings was determined.
d) Based on an anxiety score, students are divided into three groups: "low-stressed students", "moderately-stressed students" and "highly-stressed students. Exam performance is measured from 1 to 100 . You want to test the hypothesis that exam performance differs based on exam anxiety levels amongst students? Assume that the data violates the assumptions of a parametric test.
e) Interest in conservation is believed to be influenced by level of education. Participants were classified into three groups according to their highest level of education; "high school", "college" or "university", in that order; The researcher is interested in determining whether the effect of education level on interest in conservation was different depending on gender.

## QUESTION 5

A wildlife ecologist is interested in investigating whether springbok foreleg and hindleg length are the same. To find this out, the ecologist measured the length of the left foreleg and left hindleg for ten (10) springboks. Use the SPSS outputs provided to answer questions that follow.
a) What statistical test would you use to investigate whether the left foreleg and left hindleg
lengths of springbok are equal or not.
b) State the null and alternative hypotheses for this investigation.
c) Is the assumption of normality met or violated? Explain and provide evidence for your answer.
d) State whether the assumption of outliers is met or not (Explain and provide evidence for your answer.
e) Report on the descriptive statistics of the lengths of the springbok forelegs and hindlegs.
f) Determine whether forelegs and hindlegs of springbok were statistically significantly different in length.

|  | Kolmogorov-Smirnov $^{\text {a }}$ |  |  | Shapiro-Wilk |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

| Pair <br> 1 | Hindleg length in cm - Foreleg length in cm |  | 3.30000 | 3.05687 | . 96667 | 1.11325 | 5.48675 | 3.414 | 9 | . 008 |

## QUESTION 6

A researcher is interested in determining whether the effect of education level on interest in conservation was different for male and female. Use the SPSS outputs provided to answer the question that follow.
a) What statistical test would you use to determine whether the effect of education level on interest in conservation is different for males and females (i.e.,
different depending on gender)?
b) State whether the assumption of normality in the test mentioned in (a) is met or not.
c) State whether the assumption of homogeneity of variances is met or not.
d) Explain how profile plots can be used to determine whether an interaction exists between two independent variables.
e) Determine whether there is a statistically significant interaction effect between gender and education level.

| Gender | Level of education |  | Kolmogorov- <br> Smirnov ${ }^{\text {a }}$ |  |  | Shapiro-Wilk |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| a. R Squared $=.883$ (Adjusted R Squared $=.872$ ) |  |  |  |  |  |  |

## QUESTION 7

Discuss how you would deal with outliers resulting from the following:
a) Data entry error
b) Measurement errors
c) Genuinely unusual values

## QUESTION 8

For each of the figures and additional information given below, provide a verbal description of the results.
a)

b)

c) Table $x$ : Nutrient concentrations of Panicum maximum growing on the granitic site under two grazing conditions. HG and LG denote high and low grazing intensity, respectively.
Interpret only results for carbon (C) and C:N ratios. For the $\mathrm{C}: \mathrm{N}$ ratios, the statistics p -value is 0.6827.

|  | N \% | C\% | C: N | P\% | Ca\% | Mg\% | K\% | Na\% |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| HG | $0.87 \pm 0.08$ | $40.38 \pm 0.26$ | $48.33 \pm 4.18$ | $0.06 \pm 0.01$ | $0.88 \pm 0.06$ | $0.21 \pm 0.01$ | $0.42 \pm 0.06$ | $0.06 \pm 0.01$ |
| LG | $0.83 \pm 0.07$ | $40.75 \pm 0.36$ | $50.95 \pm 4.59$ | $0.05 \pm 0.01$ | $0.90 \pm 0.04$ | $0.20 \pm 0.01$ | $0.32 \pm 0.02$ | $0.05 \pm 0.01$ |
