## FACULTY OF HEALTH, NATURAL RESOURCES AND APPLIED SCIENCES

SCHOOL OF AGRICULTURE AND NATURAL RESOURCE SCIENCES DEPARTMENT OF NATURAL RESOURCES SCIENCES

| QUALIFICATION: BACHELOR OF NATURAL RESOURCES MANAGEMENT HONOURS |  |
| :--- | :--- |
| QUALIFICATION CODE: 08BNRH | LEVEL: 8 |
| COURSE CODE: RMC811S | COURSE NAME: RESEARCH METHODS FOR NATURAL <br> SCIENCES |
| DATE: JUNE 2023 | MARKS: 100 |
| DURATION: 3 HOURS |  |

| FIRST OPPORTUNITY EXAMINATION QUESTION PAPER |  |
| :--- | :--- |
| EXAMINER(S) | Dr Tendai Nzuma (Section A: Scientific Writing) <br> Dr Meed Mbidzo (Section B: Statistics) |
| MODERATOR: | Dr M. Mwale |

| INSTRUCTIONS |
| :--- | :--- |
| 1. Answer ALL the questions. |
| 2. Write clearly and neatly. |
| 3. Number the answers clearly. |

## PERMISSIBLE MATERIALS

1. Examination question paper
2. Answering book
3. Calculator

THIS QUESTION PAPER CONSISTS OF 6 PAGES (Excluding this front page)

## SECTION A: SCIENTIFIC WRITING

## QUESTION 1

Explain the structure of a scientific research paper and the purpose of each section.

## QUESTION 2

Describe the characteristics of a good scientific abstract and provide an example of an abstract from a research article conducted in Namibia.

## QUESTION 3

Discuss the importance of citing sources in scientific writing, and provide an example of a correctly cited reference from a research article using a referencing style you have learnt.

## SECTION B: STATISTICS

## QUESTION 4

Four varieties of house plants were planted in a greenhouse and their heights in cm were obtained. Answer the questions that follow using the SPSS outputs provided below.
a) What test would be appropriate to test the hypothesis that all four plant
varieties reach the same maximum height?
b) Name three assumptions related to how your data fits the test mentioned in (a)
c) State whether the three assumptions mentioned in (b) are met or not (provide evidence for your answers).
d) Report on the descriptive statistics of the plant heights for the different plant varieties.
e) Determine whether the four plant varieties reach the same maximum height? an
f) If there is a statistically significant difference in plant heights of the four varieties, explain where the difference lies by providing evidence.

|  | Plant variety | Kolmogorov-Smirnov ${ }^{\text {a }}$ |  |  | Shapiro-Wilk |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## QUESTION 5

Suppose we want to investigate the relationship between the number of hours studied and the marks obtained on an exam. A sample of 20 Research Methods students were randomly selected, and the number of hours they studied, and their exam mark were recorded. Use the SPSS outputs provided to answer the questions that follow.
a) Describe the general relationship that exists between exam marks and time spent studying. Provide evidence for your answer.
b) Did the data meet the assumption of homoscedasticity? Explain your answer.
c) Did the data meet the assumption of normality? Explain your answer.
d) Did the data meet the assumption of no significant outliers? Explain your answer.
e) What proportion of the variance in the response variable is explained by the predictor variable? Explain fully.
f) Determine whether the regression model results in a statistically significantly better prediction of the dependent variable than if we just used the mean of the dependent variable. Provide evidence for your explanation.
g) Compute a regression equation using the SPSS output provided to predict the exam mark a student would obtain if they studied for 5 hours.
Scatter Plot of Exam Mark by Hours Studied

| Model Summary $^{\mathbf{b}}$ |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :---: |
| Model |  |  |  | Std. Error of the |  |  |

QUESTION 6
a) What does it mean to have data that are non-parametric?
b) What are the two main drawbacks of non-parametric tests?

QUESTION 7
a) In an experimental design, what is a control group and why is it important?
b) What is the importance of controlling for confounding variables in an
experimental design?
c) Define a simple random sample.
