QUESTION 2 [20]

The Office of The Bursar at NUST revealed some information regarding method of payment for a group of 2000 students at different levels of study.

	Bursary	Loan	Self	Totals
Certificate	12	379	727	1118
Diploma	39	106	642	787
Degree	48	20	57	95

- 2.3 Find the probability of randomly selecting one student from this group who has a Bursary or Degree? (5)
- 2.4 What is the chance of randomly selecting one student with a degree, given that this student has a loan? (6)

QUESTION 3 [20]

- 3.1 State the properties of the normal distribution function. (5)
- 3.2 The time it takes for a haircut is approximately normally distributed with a mean of 70 and a standard deviation of 8. What is the probability that a haircut will take
- 3.2.1 At least 77 ? (5)
- 3.2.2 Between 64 and 76 (both inclusive)? (5)
- 3.2.3 At most 65 (5)

QUESTION 4 [15]

Research has shown that 12 students enter a certain library in every 30 minutes. What is the probability that:

- 4.1 exactly 15 students will enter the library in the next 30 minutes time? (5)
- 4.2 at most 5 students will enter the library in the next 10 minutes time? (5)
- 4.3 at least 10 students will enter the library in the next 1 hour time? (5)

QUESTION 5 [15]

A local switchboard handles 0 to 5 service calls on any given day. The probability distribution for the number of service calls is as follows

Number of service calls (x)	Probability, p(x)
0	0.10
1	0.15
2	0.30
3	0.20
4	0.15
5	0.10
