| SECOND OPPORTUNITY/SUPPLEMENTARY EXAMINATION QUESTION PAPER |  |
| :--- | :---: |
| EXAMINER: | Mr F. J. Louw |
| MODERATOR: | Mr S. Sinvula |

## INSTRUCTIONS

1. You MUST answer ALL QUESTIONS
2. Write clearly and neatly.
3. Number the answers clearly.
4. Make sure your Student Number is on the EXAMINATION BOOK(s).
5. MAKE SURE YOUR STUDENT NUMBER IS ON ALL THE DATA SHEETS AND THAT YOU SUBMIT THEM WITH YOUR EXAMINATION BOOK(S).

PERMISSIBLE MATERIALS

1. Calculator, ruler, pencil and eraser.

THIS QUESTION PAPER CONSISTS OF 6 PAGES (Including this front page and 2 Data Sheets)

## Question 1

1.1. Distinguish between Precise Observations and Accurate Observations.
1.2. Distinguish between the terms Grid and Graticule.
1.3. Why should intermediate sights onto important points be avoided during levelling?
1.4. Briefly describe ANY FOUR characteristics of Contours.
1.5. What are the purposes of a Reference Object $(R / O)$ ?
1.6. Name the THREE requirements of a Reference $\operatorname{Object}(R / O)$.
1.7. There are two principal classifications of surveying, name ANY ONE and fully explain it.
1.8. Briefly explain how a surveyor would take a level reading under a bridge. What is this method called?

## Question 2

You are appointed to subdivide an Erf in Windhoek North. You found two working stations from previous surveys done by another land surveyor, but you are not able to set-up your instrument any one of them. Use the information below to calculate co-ordinates for Rev1.

## Please note:

- The Atmospheric Correction and the Conversion to German Legal Metre is already applied to all measured distances
- You have to calculate a DOUBLE REVERSE POLAR.
- Use the following combination: Hohe Win and WP1, and Nubuamis and WP2

Combined Sea level \& Scale Enlargement Factor $=1+\left[\left(y^{2} /\left(2 R^{2}\right)-H / R\right)\right]$, where $R=6370 \mathrm{~km}$ and $H=1700.000 \mathrm{~m}$

## Co-ordinates

## Point

## $Y$

## $x$

Hohe Win
$-11071.260+64410.770$
Nubuamis $\quad-5533.620+53318.300$
WP1 - $7751.067+60651.665$
WP2 $-7863.582+60667.863$
@Rev1 $\mathrm{HI}=1.580 \mathrm{~m}$

| Point | Mean. Observ. Hor. Direction | Slope Distance | Zenith Angle |
| :--- | :---: | :--- | :--- |
| Hohe Win | $319^{\circ} 05^{\prime} 01^{\prime \prime}$ |  | $87^{\circ} 19^{\prime} 15^{\prime \prime}$ |
| WP1 | $65^{\circ} 47^{\prime} 16^{\prime \prime}$ | 49.117 | $87^{\circ} 42^{\prime} 17^{\prime \prime}$ |
| Nubuamis | $162^{\circ} 48^{\prime} 38^{\prime \prime}$ |  | $88^{\circ} 59^{\prime} 21^{\prime \prime}$ |
| WP2 | $298^{\circ} 13^{\prime} 06^{\prime \prime}$ | 76.877 | $89^{\circ} 44^{\prime} 12^{\prime \prime}$ |
| RO | $319^{\circ} 05^{\prime} 13^{\prime \prime}$ |  | $87^{\circ} 19^{\prime} 01^{\prime \prime}$ |

## Question 3

3.1. Calculate oriented directions for the traverse by completing the direction sheet on Data Sheet 1. Use the said Data Sheet for all your calculations. Please detach the Data Sheet and submit with your examination book.
3.2. Calculate the final co-ordinates for the traverse points on Data Sheet 2. Use the said Data Sheet for all your calculations. Use the Bowditch Rule to adjust the traverse. Please note that the directions are oriented, and the distances are final. Please detach the Data Sheet and submit with your examination book.

## Question 4

Use the information and observations below to calculate the co-ordinates for the point RES, by using the
Q-point method for a resection calculation.

## Co-ordinate List.

| Name | Y | X |
| :---: | :---: | :---: |
| $\triangle$ MOUNT | + 33252.460 | + 182505.030 |
| $\triangle$ SPOON | +53689.320 | +203390.460 |
| $\triangle$ VALLEY | + 27619.400 | + 194045.970 |
| @ RES | Height of Instrumen | 853 |
| Name | Fin. Observed |  |
| $\triangle$ VALLEY | $290^{\circ} 00{ }^{\prime \prime}$ |  |
| $\triangle$ SPOON | $66^{\circ} 08^{\prime} 37^{\prime \prime}$ |  |
| $\triangle$ MOUNT | $177^{\circ} 03^{\prime} 12^{\prime \prime}$ | Long Leg |

## Question 5

Use the information below to answer the questions that follow.
Co-ordinates

| Name | $\mathbf{Y}$ | $\mathbf{X}$ | Description |
| :--- | :---: | :--- | :--- |
| $\Delta$ Blau | +37054.410 | +228354.540 | Standard Concrete Pillar |
| Kalk | +43991.910 | +219483.720 | Iron Standard |
| Morn | +43786.880 | +222042.600 | 20 mm Iron Peg |

| @ Kalk | Height of Instrument $=1.655 \mathrm{~m}$ |
| :---: | :---: |
| Name | Final Observed Direction |
| $\Delta$ Blau | $315^{\circ} 58^{\prime} 15^{\prime \prime}$ |
| Morn | $355^{\circ} 25^{\prime} 03^{\prime \prime}$ |
| MAST | $70^{\circ} 54{ }^{\prime \prime}$ |

| @ Morn |  | Height of Instrument $=1.685 \mathrm{~m}$ |
| :--- | :--- | :--- |
| Name |  | Final Observed Direction |
| $\triangle$ Blau |  | $313^{\circ} 09^{\prime} 15^{\prime \prime}$ |
| MAST | $109^{\circ} 43^{\prime} 13^{\prime \prime}$ |  |
| Kalk | $175^{\circ} 25^{\prime} 12^{\prime \prime}$ |  |

5.1. Use the above observations and information to calculate orientated directions at Kalk and Morn.
5.2. Calculate the MEAN co-ordinates of point MAST.
