

NAMIBIA UNIVERSITY

OF SCIENCE AND TECHNOLOGY

FACULTY OF HEALTH AND APPLIED SCIENCES

DEPARTMENT OF NATURAL AND APPLIED SCIENCES

QUALIFICATION: VARIOUS	
QUALIFICATION CODE: VARIOUS	LEVEL: 4
COURSE NAME: BASIC SCIENCE	COURSE CODE: BSC410S
SESSION: JANUARY 2020	PAPER: THEORY
DURATION: 3 HOURS	MARKS: 100

	SUPPLEMENTARY/SECOND OPPORTUNITY EXAMINATION PAPER
EXAMINER(S)	MR PETRUS PAULUS, DR MARIUS MUTORWA AND MR EMMANUEL EJEMBI
MODERATOR:	PROF HABAUKA KWAAMBWA

INSTRUCTIONS

- 1. Write all your answers in the answer booklet provided, using black/blue ink pen only.
- 2. Read the whole question before answering.
- 3. Begin each question on a new page.
- 4. The Periodic Table is attached at the back of this question paper.

PERMISSIBLE MATERIALS

- 1. Examination script
- 2. Scientific Calculator

THIS QUESTION PAPER CONSISTS OF 10 PAGES (INCLUDING THIS FRONT PAGE AND PERIODIC TABLE)

J. . _ . 1"

SECTION A: BIOLOGY	[35]
QUESTION 1: Multiple Choice. Each question carries 2 marks.	[20]
 1.1 Which two of the following are the features used by microorganisms for Movement? A. Cilia and Legs B. Flagella and Legs C. Cilia and Fins D. Flagella and Cilia 	(2)
 1.2 Which of the following are kingdoms classified as Prokaryotic? A. Archaea and Bacteria B. Archaebacteria and Eubacteria C. Archaea and Eukarya D. Eukarya and Bacteria 	(2)
 1.3 Dioecious are A. Organisms that cannot reproduce sexually. B. Plants that have male flowers on one plant and female flowers on another plants. C. Plants that have male and female reproductive parts on different locations on the plant. D. Plants that produce leaves throughout the year. 	(2) same
 1.4 The two types of competitions found in ecology are: A. Endoparasites and Ectoparasitic competition. B. Interspecific and Endospecific competition. C. Intraspecific and interspecific competition. D. Ectospecific and Endospecific competition. 	(2)
 1.5 Detritivores/Scavengers refers to A. Organisms that feed both on plants and animals B. Organisms that end the food chain or food web C. Organisms that feed on tissues of dead organisms D. Organisms that are not required in the ecosystem 	(2)
 1.6 Components of the ecosystems that are essentially indispensable to its smooth functio are A. Biotic and Abiotic factors B. Producers and the Sun C. Producers and Decomposers D. Primary and Secondary consumers 	ning (2)

A. B. C.	monosaccharide and disaccharide carbohydrates and proteins vitamins and minerals carbohydrates and lipids	.)
A. B. C.	tamins that can be toxic to the body when taken in excessive amount are (2 Vitamin B and D Vitamin C and K Vitamin A and K Vitamin B and C)
to A. B. C.	ne of the main reasons for the increased use of Biotechnology by the food industry is due (2) The need to change nutritional value of the food product Attempts to increase efficiency and reduce environmental impact of production Intentions to create or improve sensory characteristics All of the statements above are correct	
A. B. C.	Which one of the following does not describe the production of gasohol? (2 It involves the extraction and washing of cane. The dilute alcohol is distilled to yield bagasse only. The sugars are crystalized out to give molasses. The molasses is fermented by microorganism to yield dilute alcohol.)

QUESTION 2 Structured questions	[15]
2.1 Discuss how a scientific name is written following the principles of the binomial nomeno system.	clature (3)
2.2 Explain why scientific names are more important than common names?	(2)
2.3 Briefly explain three factors that cause organisms to become endangered or extinct.	(3)
2.4 Differentiate between polyunsaturated and monounsaturated fat in terms of bonds.	(2)
2.5 Describe the role of iron in the human body.	(2)
2.6 Define fermentation and explain it role in the production of gasohol?	(3)
SECTION B: CHEMISTRY QUESTION 3:	[35] [20]
Question Type: Multiple Choice. Choose and write a letter corresponding to the correct are Each correct answer carries 2 marks.	ıswer.
 3.1 A process which involves the input of energy or absorption of heat is called: A. exothermic B. dissolving C. endothermic D. thermodynamic 	(2)
 3.2 An appropriate physical method that can be used to separate an insoluble solid from a liquid is A. chromatography B. separating funnel C. fractional distillation D. filtration 	(2)

 3.3 How does the presence of a soluble salt affect the freezing point and boiling point of wa A. raises the freezing point and lowers the boiling point B. lowers the freezing point and lowers the boiling point C. lowers the freezing point and raises the boiling point D. raises the freezing point and raises the boiling point 	ter? (2)
3.4 Which of the following measurements has the greatest number of significant figures? A. 0.2400 mL B. 0.00240 mL C. 24000 mL D. 2.40×10^9 mL	(2)
3.5 A cyclist travels a distance of 0.5 Km in a time of 0.5 hours. The speed of the cyclist in SI units is equal to A. 0.28 m/s B. 0.3 m/s² C. 1 Km/h D. None of the above	(2)
 3.6 The reproducibility of a series of measurements can be defined as the: A. accuracy of the measurements B. precision of the measurements C. uncertainty related to the measurements D. none of the above 	(2)
 3.7 In terms of bonding, elements found in Group 5 of the Periodic Table tend to A. Lose five electrons B. Lose three electrons C. Gain three electrons D. Gain five electrons 	(2)
3.8 The mixture of two or more metals is known as A. Ore B. Alloy C. Metalloid D. Mineral	(2)
 3.9 A common use of nitric acid is the; A. manufacture of non-soapy detergents B. treatment of water C. electrolyte in car-lead batteries D. manufacture of fertilizers and explosives 	(2)

A. Sodiu B. Sodiu C. Sodiu	emical name for washing soda is: Im hydrogen carbonate Im carbonate decahydrate Im hydroxide Im chloride	(2)
QUESTION 4	<u>4</u>	15]
	ypes: Brief statement responses. the following terms:	(5)
a. Hom	nogenous mixture	
b. Qua	ntitative measurement	
c. Accı	uracy	
d. An i	ndicator	
e. Chem	ical property	
4.2 In terms	s of kinetic theory, discuss how the change in temperature influences the behavi	our
of atoms	during the condensation phase change i.e. changes from gaseous state to liquid sta	ate. (3)
a k	any significant figures does each of the following measurements have? a. 2.0020 mm b. 0.000740 g c. 88 000 Kg d. 2 020 000.0 km	(4)
4.4 List two	uses for calcium oxychloride.	(2)
	ulture, it is important to monitor the pH of the soil to ensure the growth of crops. ou would treat soil that is too acidic.	(1)

5.6 W	hat is the formula for calculating acceleration?	(2)
В. С.	Acceleration = mass/velocity Acceleration = force/mass Acceleration = mass/force Acceleration = mass/distance	
	car of mass 1000 kg can produced a force of 8000 N by the engine. Calculate the ration of the car.	(2)
В. С.	8 m/s ² 800 m/s ² 10000 m/s ² 100000 m/s ²	
	geothermal energy, produced from underground rocks is used to drive turbine drive electric generators to produce electricity.	s, (2)
В. С.	water steam dust fire	
5.9 WI	hich of the following is an example of non-renewable energy?	(2)
В. С.	Wind energy Geothermal Nuclear energy Biofuels	
A. B. C.	nergy possessed by a body by virtue of its motion is called Physical energy Potential energy Kinetic energy geothermal energy	(2)

QUESTION 6	[10]
Question Type: Structured questions	
6.1 What is the full meaning of the acronym T.A.I.L.S used in line graphs?	(2)
6.2 State two advantages and two disadvantages of using Biofuel energy source?	(2)
6.3 State Newton's second law of motion.	(2)
6.4 You carry a 20 kg suitcase upstairs for a distance of 4 m , how much work did you do?	(4)
Taking acceleration due to gravity $g = 10 \text{ m/s}^2$.	

END OF EXAM
