OF SCIENCE AND TECHNOLOGY

**FACULTY OF HEALTH AND APPLIED SCIENCES**

**DEPARTMENT OF MATHEMATICS AND STATISTICS**

<b>QUALIFICATION:</b> BACHELOR OF SCIENCE	
<b>QUALIFICATION CODE:</b> 07BOCS	<b>LEVEL:</b> 5
<b>COURSE CODE:</b> PBT501S	<b>COURSE NAME:</b> PROBABILITY THEORY 1
<b>SESSION:</b> JANUARY 2019	<b>PAPER:</b> THEORY
<b>DURATION:</b> 3 HOURS	<b>MARKS:</b> 90

**SECOND OPPORTUNITY EXAMINATION QUESTION PAPER**

<b>EXAMINER</b>	Mr. A.J. ROUX
<b>MODERATOR:</b>	Dr. D. NTIRAMPEBA

**INSTRUCTIONS**

1. Answer ALL the questions in the booklet provided.
2. Show clearly all the steps used in the calculations.
3. All written work must be done in blue or black ink and sketches must be done in pencil.

**PERMISSIBLE MATERIALS**

1. Non-programmable calculator without a cover.

**ATTACHMENTS**

1. Standard Normal Cumulative Probability Table

**THIS QUESTION PAPER CONSISTS OF 3 PAGES (Including this front page)**

**QUESTION 1 [15]**

A standard deck of playing cards contains 52 cards, 13 belonging to each of the four suites "Spades", "Hearts", "Diamonds" and "Clubs". Each suite has 4 faces (Ace, Jack, Queen, and King) and 9 numbers (2-10). A hand of 10 cards is dealt from a well-shuffled standard deck of playing cards. What is the probability that the hand contains:

- 1.1) no face? (2)
- 1.2) exactly 4 clubs? (2)
- 1.3) 2 spades and 5 diamonds? (3)
- 1.4) at most 3 faces? (4)
- 1.5) at least 2 hearts? (4)

**QUESTION 2 [35]**

2.1 Birth weights of babies in Guatemala were found to have mean  $\mu = 2860$  grams and standard deviation  $\sigma = 440$  grams. Assuming that the birth weights of babies are normally distributed and a sample of 50 babies is to be selected

- 2.1.1) What is the probability that the sample mean will be between 2740 and 2900 grams? (5)
- 2.1.2) What is the maximum weight below which 8.85 % of all babies would fall? (5)

2.2 Past examination results for an elementary mathematics course at NUST indicates that 90% of all students always pass this course. A lecturer considered the results for a class of 25 students in this course, what is the probability that:

- 2.2.1) Exactly 20 students will pass the course (3)
- 2.2.2) At least twenty students will pass the course (6)
- 2.2.3) At most twenty four students will pass the course (6)

2.3 The call centre of cellular banking branch receives on average 6 calls per minute. What is the probability that for the next minute:

- 2.3.1) No calls will be received during the next minute (4)
- 2.3.2) At least two calls will be received during the next minute (6)

**QUESTION 3 [30]**

The probability density function of a continuous random variable  $X$  is given by

$$f(x) = \begin{cases} k(x^2 - x), & \text{if } 1 \leq x \leq 3 \\ 0, & \text{otherwise} \end{cases}$$

Please, give all answers as vulgar fractions (**NOT** decimals.)

- 3.1) Find the value of a constant  $k$  (6)
- 3.2) Find the mean of  $X$  (6)
- 3.3) Find the variance of  $X$  (6)
- 3.4) Find  $P(X \geq 2)$  (6)
- 3.5) Find  $P\left(\frac{3}{2} < X < \frac{5}{2}\right)$  (6)

**QUESTION 4 [10]**

A factory production line is manufacturing bolts using three machines, A, B and C. Of the total output, machine A is responsible for 25%, machine B for 35% and machine C for the rest. It is known from previous experience with the machines that 5% of the output from machine A is defective, 4% from machine B and 2% from machine C.

- 4.1) What is the probability that a randomly selected bolt is defective? (7)
- 4.2) A bolt is chosen at random from the production line and found to be defective. What is the probability that it came from machine B? (3)

XX

# Standard Normal Cumulative Probability Table

Cumulative probabilities for NEGATIVE z-values are shown in the following table:

z	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
