

## FACULTY OF HEALTH, NATURAL RESOURCES AND APPLIED SCIENCES DEPARTMENT OF AGRICULTURE AND NATURAL RESOURCE SCIENCES

QUALIFICATION : BACHELOR OF SCIENCE IN AGRICULTURE	
QUALIFICATION CODE: 07BAGA	LEVEL: 7
COURSE CODE: RME620S	COURSE NAME: BASIC RESEARCH METHODOLOGY
DATE: JANUARY 2023	
DURATION: 3 HOURS	MARKS: 100

SECOND OPPORTUNITY/SUPPLEMENTARY EXAMINATION QUESTION PAPER		
EXAMINER(S)	Dr Thinah Moyo	
MODERATOR:	Dr Tendai Nzuma	

INSTRUCTIONS		
	1.	Answer ALL five (5) questions.
	2.	Please write neatly and legibly.
	3.	Number the answers clearly.
	4.	Show all your working.
	5.	Round your answers to two decimal places for all calculations.

## **PERMISSIBLE MATERIALS**

- 1. Examination question paper
- 2. Answering book
- 3. Calculators

THIS QUESTION PAPER CONSISTS OF 3 PAGES (Excluding this front page)

**QUESTION 1** [20 Marks] (a) How would you best describe a research proposal? (5 Marks) (b) State four reasons why research proposals are written. (4 Marks) (c) Explain in 3 strong points the purpose of a good literature review. (6 Marks) (d) What is meant by the acronym SMART objectives in research? (5 Marks) **QUESTION 2** [20 Marks] (a) What is the difference between quantitative and qualitative research methods? (2 Marks) (b) Explain why research is considered to be an iterative process. (2 Marks) (c) Define mixed-methods research? (2 Marks) (d) You are interested in knowing what percent of all households in a large city have a single woman as the head of the household. To estimate this percentage, you conduct a census survey with 300 households and determine how many of these 300 are headed by a single woman. In this example, (i) what is the population? (2 Marks) (ii) what is the sample? (2 Marks) (iii) (2 Marks) what is the parameter? (iv) what is the variable? (2 Marks) (v) what is the statistic? (2 Marks) (e) List incorrect citations from the paragraph below. According to (Scoones, 2009), diverse livelihoods emerge from multiple activities interacting with each other. Several factors influence smallholder farmers' choice of livelihood strategies and dependence on agriculture (Ellis 1998; Alemu, 2012). Sikhweni & Hassan (2014) state that apart from understanding rural households' preferred livelihood strategies, underlying determinants driving them towards any of the

(f) Is this a correct way of listing this journal article using APA 6<sup>th</sup> Edition referencing style? Francis, D. & Moyo, T. (2022). Making minds: What's wrong with education, and what should we do about it? Journal of Teaching and Teacher Education, 11(3), 229-241. (1 Mark)

livelihood choices are equally important for an investigation.

(3 Marks)

QUESTION 3 [20 Marks]

You take a random sample of ten car owners and ask them, "To the nearest year, how old is your current car?" Their responses are as follows: 0 years, 1 year, 2 years, 4 years, 8 years, 3 years, 10 years, 17 years, 2 years, 7 years.

(a) To the nearest year, what is the standard deviation of this sample?

(15 Marks)

$$s = \sqrt{\frac{\sum (x - \overline{x})^2}{n - 1}}$$

Hint:

(b) What is the mode and median for the age of the cars?

(5 Marks)

QUESTION 4 [20 Marks]

- (a) A Real Estate Agent tells you that the average cost of houses in a town is NAD2,176,000. You want to know how much the prices of the houses may vary from this average. What measurement do you need? (2 Marks)
  - A. standard deviation
  - B. interquartile range
  - C. variance
  - D. percentile
- (b) To the nearest thousandth, what is the mean of the following data set? 0.003, 0.045, 0.58, 0.687, 1.25, 10.38, 11.252, 12.001 (2 Marks)
- (c) To the nearest tenth, what is the median of the following data set? 18, 21, 17, 18, 16, 15.5, 12, 17, 10, 21, 17. (2 Marks)
- (d) Define a percentile.

(2 Marks)

- (e) Which of the following is an example of a quantitative variable (also known as a numerical variable) and why? (2 Marks)
  - A. the colour of an automobile
  - B. a person's region of residence
  - C. a person's postal code
  - D. a person's height, recorded in centimetres
  - E. choices (C) and (D)
- (f) From the scenario in (d) above, which variables are qualitative and why? (6 Marks)
- (g) You took a survey of 100 people and found that 60% of them like chocolate and 40% don't. Which of the following results presentations gives the distribution of the "chocolate versus no chocolate" variable? (4 Marks)
  - A. a table of the results
  - B. a pie chart of the results
  - C. a bar graph of the results

D. a sentence describing the results

E. all of the above

QUESTION 5 [20 Marks]

(a) If the formula for a regression line is **y**= **6x** +**10**. Describe the components of this line and the interpretation thereof. (5 Marks)

- (b) State and describe 5 common data distribution patterns in statistics. (10 Marks)
- (c) Define correlation coefficient and state two known properties of this coefficient. (5 Marks)

THE END

**Total Marks: 100**
