a. Plot the data in a scatter diagram / plot.
b. Based on the scatter diagram, is the relationship between $x$ and $y$ linear or non-linear?

## QUESTION 3

| Park Name | Year | Zebra | Elephant | Springbok | Kudu | Gemsbok |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Etosha NP | $\mathbf{2 0 0 0}$ | 29 | 26 | 13 | 24 | 30 |

a) Based on the animal count data in the table above, test the hypothesis that the population of Zebras, Elephants, Springbok and Kudu counted in the three national parks from 2000 to 2002 was significantly different?
b) Of the four animals species in the three national parks, which animal had the highest probability of been seen (or observed) during these surveys? Provide the probability value as well.

## QUESTION 4

a) List at least five important questions that a researcher must bear in mind when conducting a literatre review.
b) With reference to the research process, briefly explain how you would organize the literature review process.
$\qquad$

| $\bar{x}=\frac{\sum_{i=1}^{n} x_{i}}{n}$ | $s^{2}=\frac{\sum_{i=1}^{n}\left(x_{i}-\bar{x}\right)^{2}}{n-1}$ |
| :---: | :---: |
| $\chi^{2}=\sum \frac{(O-E)^{2}}{E}$ | $r=\frac{1}{n-1} \sum_{i=1}^{n}\left(\frac{x_{i}-\bar{x}}{s_{x}}\right)\left(\frac{y_{i}-\bar{y}}{s_{y}}\right)$ |
